

PML — [PayMyLoan.ai](#) Product Board

<aside>

🎯 PML takes the chaos out of private lending — giving borrowers clarity and lenders control, so every deal closes clean.

</aside>

Vision

[PayMyLoan.ai](#) (PML) is a private money lending platform that connects borrowers and lenders, manages loan servicing, generates documents, and integrates insurance — from pitch to payoff in one place.

Who It Helps

- 🏠 Borrower — All loans in one dashboard, pitch decks, commitment letters, automated payments, PML rating
 - 🏦 Lender — Payment tracking, borrower vetting, deal flow marketplace, visibility toggle (Open to Deals / Not Taking Loans)
 - 📁 Bookkeeper — Principal vs. interest split on every payment, exportable records, no manual entry
 - 📄 CPA — Year-end reports ready, interest income/expense separated, full export in one click
 - 🏛️ Title Company — Instant payoff statements, both parties confirmed on same number, no closing-table scrambles
 - 🛡️ Insurance Company — Mortgagee clause auto-filled from lender profile, EOI requested inside PML, carriers can bid on policies
-

Core Features

- Loan dashboard — all loans in one place (borrower + lender views)
- Pitch deck generator — borrower creates loan request, posts to marketplace
- Commitment letter generator — professional, branded, signed in-platform
- Payoff request — instant calculation, PDF generated, sent to all parties
- Payment processing — automated monthly payments, interest/principal tracking

- PML Borrower Rating — total loans, on-time rate, total borrowed, properties financed
 - PML Lender Profile — deals funded, capital deployed, avg response time, rating
-

Coming Soon

- Lender Marketplace — borrowers post deals, lenders browse and send term sheets
 - Lender Directory — searchable by location, loan size, property type, rate, PML rating; Near Me filter; Open to Deals toggle
 - Deal map — Loans Requested / Current / Closed shown by proximity (no address disclosed, zip-level only)
 - Insurance integration — EOI request to existing agent, or competing quotes from PML carrier network
 - Borrower application, credit history, entity lookup, background check
-

Revenue Model

- Subscription — borrowers and/or lenders pay monthly for platform access
 - Carrier access fees — insurance companies pay for access to qualified investor deal flow
 - Referral fees — insurance policy placements, lender introductions
-

Dev Team

- Alexis Vargas — Lead Developer (pokemapler@gmail.com)
 - Brenda Medina — GHF / Frontend (brendamedinaaguilar.96@gmail.com)
 - Andres Garcia — Developer (andresgara.AGR@gmail.com)
-

Open Questions

- Subscription pricing — what do borrowers pay vs lenders?
- Tech stack — build on GHF or standalone platform?
- MVP scope — which features ship first?
- Insurance carrier partnerships — who do we approach first?

[PML Task Board](#)

Tech Stack

- Frontend: TBD (React / Next.js recommended)
 - Backend: TBD — standalone platform (not GHL)
 - Payments: Stripe or ACH direct
 - Document generation: PDF API (WeasyPrint / Puppeteer)
 - Maps: Google Maps API or Mapbox (zip-level proximity, no addresses)
 - Email: SendGrid or Postmark for transactional emails (EOI, payoffs, confirmations)
-

Competitor Research

Space to track what others are doing and where the gaps are.

- LendingHome / Kiavi — institutional hard money, no private lender marketplace
 - Fund That Flip — institutional, no borrower/lender profile system
 - PrivateLenderLink.com — directory only, no loan servicing or documents
 - Gap: NO platform combines loan servicing + marketplace + profiles + insurance + documents in one place for private lenders
-

Brand

- Name: PayMyLoan.ai — PML (double meaning: PayMyLoan + Private Money Lender)
 - Positioning: Standalone platform — NOT Volunteer Buyers GP branded
 - Tagline: TBD — 4 options in prospectus PDF
 - Colors: TBD — currently using blue (#2563eb), gold (#F0C000), dark (#0a0a0a) on landing page
 - Landing page: myfrank.ai/paymyloan (live preview)
 - Prospectus PDF: myfrank.ai/docs/paymyloan_overview_sep3.pdf

Meeting Notes

Sept 3, 2026 — Initial product vision session with Spencer. Key decisions: borrower + lender profiles, PML rating system, lender directory with Near Me search, Open to Deals toggle, deal map (zip-level only), insurance integration (EOI request + carrier bidding), 6 user types

identified (borrower, lender, bookkeeper, CPA, title company, insurance company). Notion board + Kanban created. Dev team: Alexis Vargas (lead), Andres Garcia (frontend), Brenda (design).
